University Centre for Environmental Studies and Sustainable Development
RCE Warsaw Metropolitan
Our Region: Warsaw Metropolitan

The City of Warsaw is home to 1.75 million people. It is surrounded on all sides by a more or less contiguous green belt of forest which is what remains of Mazovia's once-extensive primaeval forest of the Puszczya type. The best preserved and rich in biodiversity part of it is protected as Kampinos National Park (KPN).
Kampinoski National Park – this is an exceptional park as it encompasses forest directly adjacent to Warsaw.
Some Facts about KPN

• In 2000, KPN was entered into the list of UNESCO Biosphere Reserves.

• It holds Europe’s largest inland dunes sharing the area with marshlands.

• There are two Educational Centres several educational trails

• and 35 km of touristic paths
The „secret power” of RCEWM it is great number and diversity of Partners
Type of Partners

• **Higher Education Institutions:** The University of Warsaw - Coordinator
  The Cardinal Wyszynski University, Warsaw University of Life Sciences, Kozminski Business School, Pedagogical University, „GENERATIONS“- Senior’s University

• **Municipal Government – The Mayor of Warsaw** Department of Infrastructure

• **Kampinos National Park**

• **UNEP/GRID Centre**

• **Cultural and Environmental NGOs:**
  The Warsaw Friends Association, Center of Culture and Civic Initiatives, Foundation Earth and People, Foundation for Sustainable Development

• **Formal Education:** Schools and „Green” Kindergarten
CHALLENGES

• The KPN and other protected areas close or even inside Warsaw agglomeration are the very important objects for environmental education and recreation for urban citizen. But the environmental awareness in urban population is not sufficient as well as average knowledge about protected area in neighborhood.

• The KPN is looking for methods of valuable education on biodiversity, attracting more visitors to Park’s educational trails and at the same time avoiding negative effects on park’s ecosystems.
RCE answer: education address to the attendance specific for each Partner

- The goal of activity it is to popularize the KPN as forest playing great role in adaptation to climate change, place for formal and non formal education and opportunity for relax and for better health condition for everybody.

- Through individually tailored methods of education oriented to different social groups by diverse Partners (webpages, organization of special events, books) we hope to inspire changes towards a more healthy and sustainable way of living in urban zones with respect for biodiversity.
Kampinos National Park - for students and citizens of the Capital city - Inauguration of exhibition organized by KPN, UCBS and State Forestests in the main hall of University of Warsaw
Students - future teachers are learning how to observe nature outside classroom
Meeting with Nature- education events for Students of The Third Age Universities and members of other Senior’s associations are organized in KPN all year round.
Inter-generations handbook-resources for learning about biodiversity (prepared by University of Warsaw and Foundation Ziemia i Ludzie).
The double-book is used by many universities for seniors

Part addressed to grandchildren

Part addressed to grandparents
Cooperation of Partners from urban zones and the KPN are based on the presumption that understanding of interrelatedness of social and environmental issues is obligatory for actions on the road to UN SDGs

• Goal 3 - Ensure healthy lives and promote wellbeing for all at all ages
• Goal 4 - Ensure inclusive and equitable education and, promote lifelong learning opportunities for all
• Goal 11 - Make cities and human settlements inclusive, safe, resilient and sustainable
• Goal 15 - Protect, restore and promote sustainable use of terrestrial ecosystem, sustainably managed forest and halt and reverse land degradation and halt biodiversity loss
Healthy Park for Healthy People
